Professional Summary

Final-year Master of Information Technology (Artificial Intelligence) student at Charles Darwin University, completing in November 2026, with a Software Engineering degree. My work starts from how a process actually runs: I talk to the people who do it, find where AI or an AI agent can help, build it, and test that it holds up in practice. I have designed a computer vision system with **NT Government Fisheries** as the stakeholder, and I build and run **AI agent** workflows day to day on **Azure** and **GitHub**.

Education

Charles Darwin University

Master of Information Technology (Artificial Intelligence) | GPA: 6/7

Nov 2024 – Nov 2026

Darwin, Australia

Firat University

Bachelor of Science (Software Engineering), Faculty of Technology | GPA: 3.26/4

Aug 2019 – Jul 2023

Elazığ, Turkey

Experience

North Australia Centre for Autonomous Systems (NACAS)

Casual Professional

Mar 2026 – Present

Darwin, NT, Australia

- Mapped the research team's manual workflow (label, export, train, predict, human review) and designed an **active-learning pipeline** to cut repeated manual steps.
- Wrote **Python** tooling to select and pre-process drone imagery before annotation, fixing image-selection issues found in the existing process.

Proculusale

Remote Intern / Volunteer

Nov 2021 – Nov 2023

Izmir, Turkey

- Worked directly with **NGOs and law firms** to understand their operational needs and deliver web and mobile solutions (**Flutter**, **Firebase**, **WordPress**).
- Designed **UI prototypes in Figma** before build and managed cloud deployments on **DigitalOcean**.

Projects

Personal AI System: Second Brain & Agents | Claude Code, Codex, Hermes Agent, Python, Azure, GitHub

2026

- Built an AI system for my own work: a **shared memory** of notes, tasks and decisions that coding agents on my PC and a **Hermes agent on an Azure VM** both work from, **kept in sync through Git**.
- Coding agents write code against **task contracts** I write, with automated checks and semantic search; I own the specs, the review and the result.
- The Azure agent runs **scheduled research and job-search tasks** and reports to me on Discord; it starts through **Azure Logic Apps** and shuts itself down when idle to stay within budget.

FishNT: AI-Based Fish Classification (Master's Thesis) | Python, YOLO26, SAM 2.1, OpenCV

May 2026

- Designed a computer vision system with **NT Government Fisheries** to automate fish detection, classification and weight estimation on a processing line, working to their operational constraints.
- Reached **99.6%** classification accuracy and **0.63 cm** mean length error; expanded a scarce dataset from 136 to 4,566 instances using **SAM 2.1**.

IT Code Fair 2025 – Dark Sky NT & Kriol Translation | Python, PyTorch, Hugging Face

Nov 2025

- **Dark Sky NT**: a tourism recommendation chatbot for non-technical users, built on retrieval-augmented generation (**RAG**, **FAISS**) and a **LoRA**-tuned LLM.
- **Kriol Translation**: an end-to-end Kriol-to-English translation system (**NLLB-200**) built with very limited data.
- **Winner (AI) & Runner-Up (Data Science)**, CDU IT Code Fair 2025; nominated for the **NT Digital Excellence Awards 2025**.

Connect4 & League of Legends Wiki MCP | PyTorch, PPO, MCP, FastAPI

Jul 2025 – Aug 2025

- Built an **MCP server** that grounds an AI assistant's answers in live wiki data to reduce made-up answers; trained a Connect4 agent with **PPO** self-play.

Skills

AI & Agents: LLMs, AI agents and multi-agent workflows (Claude Code, Codex), RAG, MCP, fine-tuning (LoRA), computer vision, NLP

Cloud & Platforms: Azure (Virtual Machines, Logic Apps), GitHub, Git, Docker, DigitalOcean, Firebase

Analysis & Delivery: Stakeholder requirements, process mapping, prototyping (Figma), testing and evaluation, plain-language documentation

Languages: Python, SQL, Java, C#, Dart

Honours & Languages

Honours: Nominated, NT Digital Excellence Awards 2025; Winner (AI) & Runner-Up (Data Science), CDU IT Code Fair 2025

Languages: Turkish (Native), English (Professional), German (Elementary)
